

Lauzet B

Wine grape variety.

Origin

This variety is native to the Pyrenees region vineyards.

Use

Wine grape variety.

Name of the variety in France

Lauzet

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Lauzet is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the small to medium adult leaves, with five or seven lobes, open very deep U-shaped lateral sinuses, a slightly open or closed petiole sinus, with sometimes naked petiole veins, short teeth compared to their width at the base, a moderate to strong anthocyanin coloration of veins, a slightly revolute leaf blade, and on the lower side of the leaves, a medium to high density of erect and prostrate hairs,
- the round-shaped berries.

Phenology

Bud burst: 5 days after Chasselas.

Grape maturity: late-season, 4 weeks after Chasselas.

Technological potential

The bunches are small and the berries are very small. Lauzet has an interesting quality potential. This variety can be used to produce dry wines that are rich in alcohol while maintaining a good acidity with fruity and spicy aromas.
