Use

Wine grape variety.

Name of the variety in France

Roussette d'Ayze

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Roussette d'Ayze is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the green young leaves with bronze spots,
- the small to medium adult leaves, with three or five lobes, a slightly open petiole sinus or with slightly overlapping lobes, short to medium teeth compared to their width at the base with straight sides, no anthocyanin coloration of veins, a twisted blistered leaf blade, and on the lower side of the leaves, a low density of erect hairs,
- the ellipsoid berries.

Cultivation and agronomic skills

Roussette d'Ayze is fairly fertile when pruned short. This variety is well adapted to glacial morain soils.

Clonal selection in France

The only certified Roussette d'Ayze clone carries the number 940.

Phenology

Bud burst: 5 days after Chasselas.
Grape maturity: early-season, 1 week and a half after Chasselas.

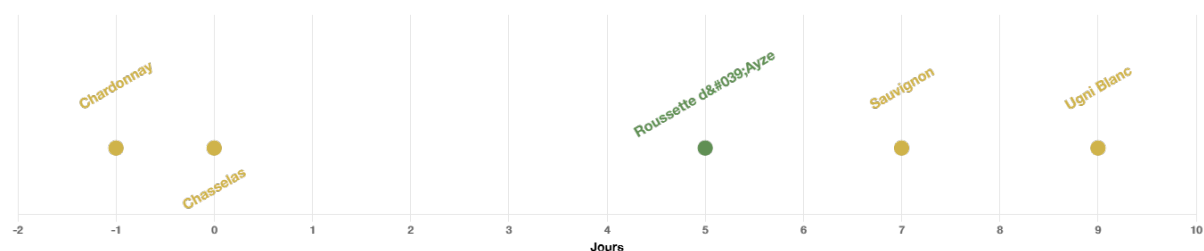

Technological potential

The bunches and berries are small to medium in size. Roussette d'Ayze produces average and not very aromatic wines. It is used for the production of base wines for sparkling wines.

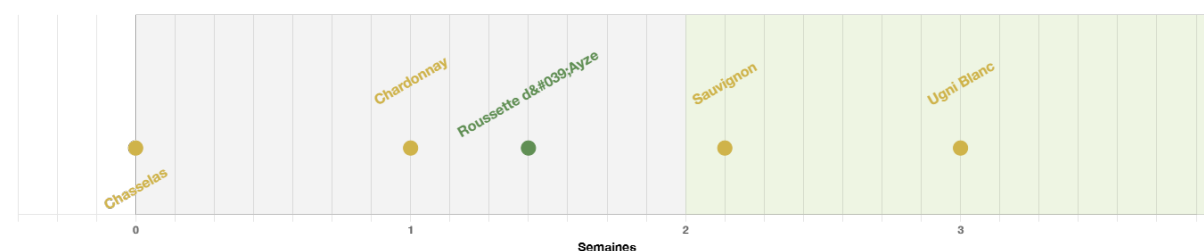

Susceptibility to Diseases and Pests

Roussette d'Ayze is susceptible to grey rot and downy mildew.
