## Genetic profile

Microsatellite	VVS2	VVMD5	VVMD7	VVMD27	VRZAG62	VRZAG79	VVMD25	VVMD28	VVMD32
Allele 1	149	229	243	186	188	246	248	233	239
Allele 2	149	236	257	186	194	252	248	235	271

### Cultivation and agronomic skills

Savagnin rose displays a similar behavior as Gewurztraminer. It is well adapted to clay-limestone terroirs and soils that do not induce too much chlorosis.

### Clonal selection in France

The only certified Savagnin rose clone carries the number 763. A conservatory of 15 or so clones has been planted in 1998 in Alsace.

### Phenology

Bud burst: same as Chasselas.

Grape maturity: early-season, 1 week and a half to 2 weeks after Chasselas.

### Technological potential

The bunches and berries are small. Savagnin rose mainly differs from Gewurztraminer as its wine does not have the spicy aromas of the latter.

### Susceptibility to Diseases and Pests

The susceptibility to diseases is comparable to that of Gewurztraminer (slightly susceptible to powdery mildew, grape moths and to grey rot).

### Debourrement

### Maturité
