

# Seyval B

Wine grape variety.

## Origin

Seyval (an interspecific hybrid) is the result of the crossbreeding between 5656 Seibel and Rayon d'Or (4986 Seibel).

## Use

Wine grape variety.

## Name of the variety in France

Seyval

## Synonymy

In France, this variety can officially be called "5276 Seyve-Villard" regarding plant propagation material.

## Regulatory data

In France, Seyval is officially listed in the "Catalogue of vine varieties" on the A list and classified. This variety is also listed in the catalogues of other Member States of the European Union: Netherlands and Romania.

## Description elements

The identification is based on:

- the tip of the young shoot with a medium density of prostrate hairs,
- the green young leaves with bronze spots,
- the entire circular adult leaves, with a slightly open or closed with overlapping lobes U-shaped petiole sinus, small to medium teeth with convex sides, a shiny and involute leaf blade, curly on the edges, and on the lower side of the leaves, a low density of prostrate hairs,
- the obloid or round-shaped berries.

# Evolution of mother vine surfaces

| Year | 1958 | 1968 | 1998 | 2008 | 2018 |
|------|------|------|------|------|------|
| ha   | 1309 | 1288 | 159  | 119  | 90   |

## Genetic profile

|          | MicrosatelliteVVS2 | VVMD5 | VVMD7 | VVMD27 | VRZAG62 | VRZAG79 | VVMD25 | VVMD28 | VVMD32 |
|----------|--------------------|-------|-------|--------|---------|---------|--------|--------|--------|
| Allele 1 | 131                | 223   | 237   | 186    | 178     | 260     | 236    | 235    | 249    |
| Allele 2 | 131                | 250   | 243   | 186    | 188     | 262     | 236    | 251    | 271    |

### Cultivation and agronomic skills

Seyval is vigorous and fertile. It can be pruned short or moderately long and is preferably trained.

### Clonal selection in France

The only certified Seyval clone carries the number 1336.

### Phenology

Bud burst: 3 days after Chasselas.

Grape maturity: mid-season, 2 weeks and a half after Chasselas.

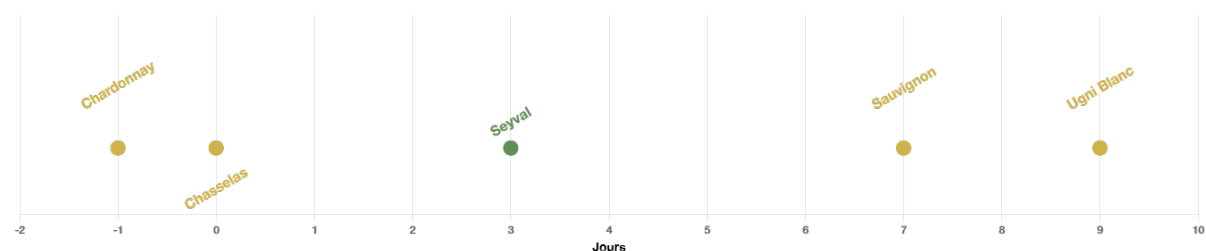

### Technological potential

The bunches are small to medium in size. The berries are also small to medium and very bloomed. Seyval produces wines of acceptable quality.

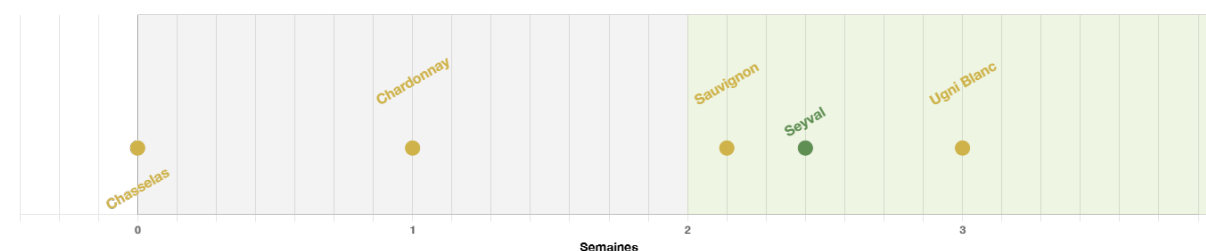

### Susceptibility to Diseases and Pests

Seyval resists moderately well to downy mildew. It is slightly susceptible to grey rot and it must be grafted.

### Debourrement

### Maturité
