Use

Wine grape variety.

Name of the variety in France

Valdigué

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Valdigué is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a high density of prostrate hairs,
- the yellow young leaves,
- the pentagonal adult leaves, entire or with three lobes, with a slightly open petiole sinus with parallel edges or slightly overlapping lobes, short teeth compared to their width at the base with straight sides, no anthocyanin coloration of veins, a blistered leaf blade, undulate between the veins, and on the lower side of the leaves, a low to medium density of erect and prostrate hairs,
- the round-shaped or slightly ellipsoid berries, with often small berries that remain green.

Cultivation and agronomic skills

This variety is fertile, productive, with an erect bearing, and is well adapted to short pruning.

Clonal selection in France

There is no certified clone for this variety yet.

Phenology

Bud burst: 4 days after Chasselas.

Grape maturity: mid-season, 3 weeks after Chasselas.

Technological potential

The bunches and berries are medium to large in size. Valdiguié produces colored, bright, light wines, with a low alcohol degree and tannins that are a little bit astringent.

Susceptibility to Diseases and Pests

Valdiguié is slightly susceptible to grey rot and powdery mildew.
