

Rèze B

Wine grape variety.

Origin

This variety is originally from Switzerland.

Use

Wine grape variety.

Name of the variety in France

Rèze

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Rèze is officially listed in the "Catalogue of vine varieties" since 2015 on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with a low density of prostrate hairs,
- the light green young leaves with no erect hairs,
- the shoots with green or red-striped internodes,
- the small to medium, pentagonal adult leaves, with three or five lobes, moderately deep upper lateral sinuses, an open U-shaped petiole sinus, medium to long teeth compared to their width at the base with convex or straight sides, no anthocyanin coloration of veins, a flat, sometimes twisted and finely blistered leaf blade, and on the lower side of the leaves, no erect and prostrate hairs,
- the round-shaped or slightly ellipsoid berries that can become golden or slightly pigmented when fully ripe.

Phenology

Bud burst: 2 days before Chasselas.

Grape maturity: early-season, 2 weeks after Chasselas.

Technological potential

Rèze's bunches are small to medium in size et moderately compact. The berries are medium, simple-flavored, with a moderately thick skin and a juicy pulp. The wines are quite neutral, light, lively, acidic and with white flowers, spice or resinous trees aromas.
