Cultivation and agronomic skills

Aptitudes are close to those of Chardonnay. Chardonnay rose seems to have a slightly later maturity and to be less productive that the white version.

Clonal selection in France

The only certified Chardonnay rose clone carries the number 1284.

Phenology

Bud burst: 1 day after Chasselas. Grape maturity: mid-season, 2 weeks and a half to 3 weeks after Chasselas.

Debourrement

Technological potential

Chardonnay rose's bunches are small and compact. The berries are small to medium and simple-flavored. It produces slightly less acidic wines with a little more sugar that those obtained with Chardonnay.

Susceptibility to Diseases and Pests

The susceptibilities and tolerances of Chardonnay rose are roughly identical to those of Chardonnay. It tends to be slightly less sensitive to grey rot.
