

New

Artys B

Wine grape variety.

Origin

Artys was obtained by INRAE. This interspecific hybrid results from the crossbreeding of a descendant of *Muscadinia rotundifolia* and Bronner.

Use

Wine grape variety.

Name of the variety in France

Artys

Synonymy

There is no officially recognized synonym in France nor in the other countries of the European Union, for this variety.

Regulatory data

In France, Artys is officially listed in the "Catalogue of vine varieties" since 2024, on the A list.

Description elements

The identification is based on:

- the tip of the young shoot with a moderate density of prostrate hairs,
- the green young leaves with a moderate density of prostrate hairs,
- the green shoots,
- the medium-sized, pentagonal adult leaves, with five lobes, a petiole sinus with slightly overlapping lobes, medium teeth with straight or convex sides, no anthocyanin coloration of veins, a slightly blistered leaf blade, and on the lower side of the leaves, a low density of prostrate hairs, - the broad ellipsoid berries.

Genetic profile
