Allele 1	131	234	239	182	184	246	233	239	238
Allele 2	143	236	239	208	194	252	247	255	242

Cultivation and agronomic skills

Bouquet 3159 is vigorous, moderately productive, and has a semi-erect bearing. It is preferable to prune it long. It does not adapt well under dry conditions.

Clonal selection in France

The only certified Bouquet 3159 clone carries the number 1423.

Phenology

Bud burst: 5 days after Chasselas.
Grape maturity: early-season, 1 week after Chasselas.

Debourrement

Technological potential

The bunches are medium-sized and moderately compact. The berries are small with a thick skin.

Bouquet 3159 is used to produce fine, balanced, and aromatic wines.

Susceptibility to Diseases and Pests

Bouquet 3159 is tolerant to downy mildew and resistant to powdery mildew. It is however susceptible to black rot and bud mite disease.

According to the breeder, based on current knowledge, two fungicide treatments for downy mildew and powdery mildew are essential to preserve resistance factors. This protection should be increased in case of high disease pressure.
