

Chasselas rose Rs

Wine and table grape variety.

Origin

This variety is the pink mutation of Chasselas.

Use

Wine and table grape variety.

Name of the variety in France

Chasselas rose

Description elements

The description corresponds to that of Chasselas, except for the skin color of the berries when ripe, which is pink in this case.

Synonymy

In the European Union, Chasselas rose is officially called by other names: Chasselas Roxo (Portugal), Chrupka cervena (Czech republic), Piros chasselas (Hungary), Rdeca zlatnina (Slovenia), Roter Gutedel (Germany) and Plemanka crvena (Croatia). These synonyms are officially recognized in France regarding plant propagation material.

Regulatory data

In France, Chasselas rose is officially listed in the "Catalogue of vine varieties" on the A list. It is classified as a wine grape variety only in some French department (see the regulations in force). This variety is also listed in the catalogues of other Member States of the European Union: Czech Republic, Germany, Hungary, Portugal, Romania and Slovenia.

Allele 2	141	234	247	186	204	260	254	267	239

Cultivation and agronomic skills

The aptitudes of Chasselas rose are very close to those of Chasselas.

Technological potential

The bunches and berries are medium in size.

Clonal selection in France

The only certified Chasselas rose clone carries the number 61 ; it has been selected for the production of wine grapes.

Phenology

Bud burst: 3 days after Chasselas.

Grape maturity: early-season, same as Chasselas.
