

Codivarta B

Wine grape variety.

Origin

This variety is found in Corsica.

Use

Wine grape variety.

Name of the variety in France

Codivarta

Synonymy

In France, this variety can officially be called "Cudiverta" regarding plant propagation material.

Regulatory data

In France, Codivarta is officially listed in the "Catalogue of vine varieties" on the A list and classified.

Description elements

The identification is based on:

- the tip of the young shoot with no or a very low density of prostrate hairs,
- the young leaves that are entirely bronzed or with bronze spots,
- the circular or wedge-shaped adult leaves, with five or seven lobes, an open U-shaped petiole sinus, small teeth, long compared to their width at the base with straight sides or with one side convex and one side concave, no or slight anthocyanin coloration, and on the lower side of the leaves, no or a very low density of erect and prostrate hairs,
- the round-shaped or broad ellipsoid berries.
